## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 – 12 are rejected under 35 U.S.C. 102 ( b ) as being anticipated by Huang ( US 5,495,675 ).

Huang discloses an archery bow sight adapted for use with an archery bow having a handle and two oppositely disposed limbs comprising a bow stabilizing bar ( 2 ) extending forwardly from the handle, a laser ( 6 ), and a mounting bracket ( 1, 3, 4, 5 ) for mounting said laser to said stabilizing bar so as to direct a laser beam forwardly from the bow, and whereby the laser is mounted to the stabilizing bar so as to direct a laser beam in a direction generally along a portion of the path of an arrow propelled by the bow ( See Figure 3 ).

Huang discloses said laser further including a laser actuation switch (61) mounted to the handle of the bow ( See Column 2, lines 42 – 43 ), and an adjustment means for adjusting the direction of the laser light beam produced by said laser ( See Column 2, lines 25 – 32 ).

Huang also discloses said mounting bracket including a first mounting bracket ( 1 ) adapted to conform to one side of said stabilizing bar, at least a second bracket ( 4 ) adapted to conform to another side of said stabilizing bar opposite said one side, and coupling means ( 3 ) for coupling said first bracket and said second bracket together while capturing said stabilizing bar therebetween.

### *Conclusion*

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following references are considered of relevance in the present application and the bow sight art :
